## FRONT END WEB DEVELOPER

Throughout my time at General Assembly, I was the go-to student in my cohort to project lead and manage—delegating tasks, checking in on deadlines, and making sure the team worked together to complete a polished and pristine front end responsive product. This parallels my skills and experience managing a music lesson studio where I trained and scheduled new teachers, connected with parents, and updated the company's websites and deliverables.

## TECHNICAL & INTERPERSONAL SKILLS

**Languages:** JavaScript, HTML, CSS, SQL, Mongo, JSON, Typescript, EJS, DTL, Python

**Libraries, and Frameworks:** React.js, Express.js, Django, JQuery, Bootstrap

**Databases, and other:** PostgreSQL, MySQL, MongoDB, RESTful Routing, JSON API, Git, GitHub, Postman (testing), Google Analytics, AWS(Amazon Web Services), Cloud Computing, UX (user experience), UI (user interface), Cloud

**Interpersonal skills:** Collaboration, Creative, Resourceful, Precise Execution, Leading With Curiosity, Research, Strong Verbal and Written Communication, Agile Methodology

## TECHNICAL PROJECTS

**Wow Generator** - [GitHub](#) | [App](#) -

**Coding language used** | HTML5, CSS3, JavaScript

*A web app that calls an API to every "Wow!" Owen Wilson has said from 1996-2017. Users can search by the number of wow's in a movie and/or by the year.*

- Created an app with a simple UI using CSS with flexbox layouts.
- Coordinated information through a third-party API in a seamless interface.
- Created a fully responsive design using CSS that readily adapts to all devices and screens.

**NYC Pizza** - [GitHub](#) | [App](#) -

**Coding language used** | Express.js, EJS, CSS

*A full stack CRUD app that calls to MongoDB server where users can score, add, edit and delete pizza shops in NYC*

- Created a full stack (front end and backend) application that allows users to add pizza shops, rate, review, and add the borough where the shop is located.
- Deployed application on Heroku so users can share with their friends.
- Created a fully responsive application that readily adapts to all devices and screens.

**KonnectuZ** - [GitHub](#) | [App](#) -

**Coding language used** | Express, React, Node.js, CSS

*A social media full stack CRUD app that uses the MERN (MongoDB, Express, React, Node) stack where users can create an account and comment on other users' posts.*

- Created an application that allows users to scroll through the user feed and see what users are posting i.e a picture or post.
- Users can sign into their existing account or create an account that has a username, password, and profile picture
- Created fully responsive design using CSS that readily adapts to all devices and screens.
- Deployed application using Netlify (client side) and Heroku (server side).

## EXPERIENCE

**Self-Employed, Freelance Front End Developer**

*New York, NY, 12/2021 - Present*

- Oversaw all operations for my freelance web development company, including project management, customer support, design, and website deployment.
- Built and deployed websites using technologies such as CSS (CSS3), HTML(HTML5), JavaScript, WIX, WordPress, EJS, Express, Node.js, React, Bootstrap, Tailwind, Sass, and others.
- Used Search Engine Optimization (SEO) to have clients' websites rank higher in browsers to generate more website traffic.

**Come Join the Band, Assistant Director**

*New York, NY, 12/2019 - 08/2022*

- Oversaw all operations for a private music studio for students ages 3-adult, including sales, marketing, hiring, and scheduling"
- Updated and maintained the WordPress website which had an average of 10-12% growth in traffic every month.

- Conducted and scheduled daily guitar lessons and jam sessions for students.

**Adorama, Audio and Computer Sales**

*New York, NY, 08/2018 - 12/2021*

- Assisted clients with both audio and computer sales while consistently reaching monthly sales goal of \$120,000.
- Developed professional relationships with small to medium-sized businesses while managing a book of 150+ clients.
