TECHNICAL PROJECTS

Wow Generator - [GitHub](#) | [App](#) -

Coding language used | HTML, CSS, JavaScript

A web application that calls an API to every "Wow!" Owen Wilson has said from 1996-2017. Users can search by the number of wow's in a movie and/or by the year.

- Created a responsive web app with a simple design and UI using CSS with flexbox layouts.
- Coordinated information through a third-party API in a seamless interface.
- Created a fully responsive design using CSS that readily adapts to all devices and screens.

NYC Pizza - [GitHub](#) | [App](#) -

Coding language used | Express.js, EJS, CSS

A CRUD application that calls to MongoDB server where users can score, add, edit and delete pizza shops in NYC

- Created a full stack application that allows users to add pizza shops, rate, review, and add the borough where the shop is located.
- Deployed application on Heroku so users can share with their friends.
- Created fully responsive design using CSS that readily adapts to all devices and screens.
